Dear Mr Barroso,

Dear Mr Barroso,

The European Commission authorized last March 2nd the culture of the Genetically Modified potato AMFLORA from BASF, first GMO authorized for the last twelve years.

The European Commission authorized last March 2nd the culture of the Genetically Modified potato AMFLORA from BASF, first GMO authorized for the last twelve years.

Let me stress my firm opposition to this authorization and denounce lies, conflicts of interests and contempt of citizens.

Let me stress my firm opposition to this authorization and denounce lies, conflicts of interests and contempt of citizens.

You claimed, through your spokeswoman, that you had « no aim at all to force the culture of GMO » on February 8th. Yet you force AMFLORA into the european catalogs on March 2nd !

You claimed, through your spokeswoman, that you had « no aim at all to force the culture of GMO » on February 8th. Yet you force AMFLORA into the european catalogs on March 2nd !

Independence of the European food safety agency (EFSA) is questioned. Its former head of the GMO unit, Mrs Suzy Renkens, joined Syngenta so as to make lobbying on GMOs !

Independence of the European food safety agency (EFSA) is questioned. Its former head of the GMO unit, Mrs Suzy Renkens, joined Syngenta so as to make lobbying on GMOs !

Your authorization is a clear contempt of the vast majority of the citizens who refuse GMO. It is also a denial of member states who set up a moratorium on the MON810 corn.

Your authorization is a clear contempt of the vast majority of the citizens who refuse GMO. It is also a denial of member states who set up a moratorium on the MON810 corn.

From a wider point of view, I strictly oppose any GMO, whether transgenic or mutagenic or any other GM food or feed. I enclose a peeling of one of those good old potatoes that I hope to go on cultivating and eat.
